

Citizen's Assembly on Climate Change

[REDACTED]

Our business, the Tara Centre (www.thetaracentre.co.uk) provides professional counselling training from level 2 to 5 with a Foundation Degree option and we also provide well being classes. We are based at the Durrell Academy and financially contribute to the Durrell Wildlife Preservation Trust.

We welcome this opportunity to contribute and we request that the following points be considered:-

Urgent population control in terms of immigration and the prohibition of selling properties to foreign investors.

The protection at all costs of the Green zone land and strict controls upon the expansion of urban sprawl on the outskirts of St Helier.

Promotion of Rubis 100, eco friendly sustainable diesel and the removal of GST on this fuel
Government subsidies on Electric cars

Promotion of Jersey as Green Zone in tourism, hire cars all becoming electric, hotels and other tourist accommodation providing electric bikes.

Strict adherence to the Ramsar agreement, which will also promote green tourism and reducing a psychologically unhealthy dependence upon the finance industry.

The mandatory "greening" of the finance industry, prohibition of investment in fossil fuels, focus on wind farms and sustainable energy.

Active promotion of solar energy, targets set for the number of homes per year to transfer to solar power and financial contributions from the Government to enable this.

Thank you
